Experiencia Gourmet

Liverpool

This project consists of an irregular video wall built by individual 55-inch screens, and 22-inch screens placed in linearly. The content displayed in these spaces includes advertising, menus and broadcasting television, which improve the Gourmet experience.

Connectivity and design

Canal ONCE

news set

Given the need for two scenarios within the same forum, 2 installations were designed (scenario A and B). Scenario A would serve as a recording space for the main news, while Scenario B would serve as a support element for various recordings. The choice of materials, as well as the careful process of lighting on the facades, furniture and white floor, allow us to project a clean, renewed and professional image.

Stand construction

Metrobus digital signage

One of the main and largest avenues of Mexico City (Av. Insurgentes), it was the place that gave life to the digital signage project. Each of the metrobus stops, which is one of the most important means of transport in the city, receives maintenance, as well as the transmission of advertising and relevant information in the 1 x 3 videowall installed.

Samsung
GALAXY S5

Samsung Galaxy S5

videowall

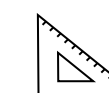

As part of the nationwide uprising campaign in Mexico, Samsung had the need for a digital advertising space and furniture. It was when the idea was conceptualized by the design area of MAX to design the need for an "All", a video wall inside a cell phone. And that was how it was delivered in different parts of the country "Case" or furniture that contained the entire advertising idea on the day of launch in Telcel stores.

Omnibus de México

Confianza en el camino.

The company OMNIBUS DE MEXICO needs to have a renew image to a cooler, cleaner and technological, it was the reason Mexico City pilot (Central de Autobuses del Norte) was developed. The division of videowalls in both formats and measures, exclusive animation, automated databases and first level service, made this project a success. Nowadays we continue remodeling and supporting the ticket offices of Reynosa, Monterrey, Querétaro, Lázaro Cárdenas, Guadalajara (modules 2 and 6), Tepic, Toluca, Chihuahua, Lázaro Cárdenas and Gómez Palacio.

Bus station

videowall

Formed by three stages, this project was the first in its category, nationally and for the company MAX SIGNAGE. The first stage consisted in the creation of a videowall composed of 26 synchronized screens linked to databases to show the different prices of each of the ticket offices. During the 2nd stage, a 3 x 3 videowall was installed that broadcasts open television as well as advertising. And as a last stage, the waiting room was conditioned so that passengers can enjoy news, as well as their favorite channels. From 2010 to date, MAX SIGNAGE has worked with: LA LINEA, ETN, OMNIBUS DE MEXICO, TAP, VIVA AEROBUS and MAZAMITLA.

Devlyn

videowall

Si no portas tu **GAFETE** no se te podrá dar acceso a las instalaciones.

Juntos construimos un mejor lugar de trabajo.

DEVLYN
ES TU CASA

Juntos construimos un mejor lugar de trabajo.

The main objective of this project was to show the internal communication of DEVLYN in a technological way. In this way, employees could receive, in an efficient, creative and dynamic way, their benefits and obligations. The professional placement of these screens in their workshops and dining areas allowed us to show their content in a timely manner. MAX was responsible for the creation and animation of its content every month.
